

$|50 - 10|$

randomly throwing two fair 6-sided dice (the faces of each die are labeled with the values 1, 2, 3,

mean of the first three common terms of these sequences.

4. Let  $y = mx + b$  be the equation of a line that contains  $(2, 18)$  and is perpendicular to the line whose

some order form an arithmetic sequence. Express your answer as an improper fraction, reduced to lowest terms.
